Subject: San Jacinto Update

Folks,

Please see the update below on the status of the San Jacinto River Waste Pits Superfund Site as of Wednesday 6/1/2016:

EPA is aware of flooding around the San Jacinto Waste Pits Superfund site. An EPA On-Scene Coordinator was dispatched to the site this afternoon to observe the site conditions. The site remains locked to prevent access. Areas of the site visible from the gate did not appear to be damaged. A follow up inspection will be conducted tomorrow. When the flood waters fully recede, a detailed cap inspection will be conducted by the potentially responsible parties under EPA oversight.

Regards,

Gary Miller
